

Northwell Health selects Secant Healthcare to migrate legacy PACS.

Chicago, Illinois – March 15, 2016 – In an effort to consolidate all their legacy picture archiving and communication systems (PACS), Northwell Health, formerly North Shore-LIJ Health System, selects Secant Healthcare to migrate legacy PACS on their large DVD library.

Northwell Health will utilize Secant Healthcare's Secure Offsite Data Migration solution to move all their patient data to a new enterprise Siemens PACS. "Northwell Health's disks will be rapidly read and converted to DICOM," said Secant Healthcare co-founder/managing partner Marwan Baya. "Our process not only converts data from one PAC to another, but we actually heal the data in a way that cleanses previously mismatched data."

Northwell Health and Secant Healthcare are long-term partners, due to Secant Healthcare's ability to extract content from any type of media and migrate it to an appropriate format within a secure, off-site facility.
