Secant Healthcare to exhibit new solutions and announce new executives at HIMSS17

Look for Secant Healthcare at Booth #**7974** on the HIMSS17 exhibit floor in Orlando, Fla.

Chicago, Ill. – January 31, 2017 – Secant Healthcare will exhibit its data migration solutions at the 2017 HIMSS Conference & Exhibition at the Orange County Convention Center in Orlando, Fla. From Feb. 19–23, 2017, more than 40,000 healthcare industry professionals are expected at the conference, where they will gain expert insights during the exchange of innovative ideas and best practices in improving health through IT.

Secant Healthcare finished 2016 with its best year on record, tripling its revenue from 2015. “The investments we made in the early part of 2016 are paying off,” said Chief Financial Officer, Tim Rogers. “As mergers and consolidation in the healthcare industry continue, our data migration solutions are in high demand.”

Specializing in new DICOM and PACS implementation, patient data flow, and data migration, Secant Healthcare will soon finalize significant contracts with two new international customers. “These new opportunities will help continue to fuel our momentum,” adds Marwan Baya, President of the company. “We will also announce vice presidents of OEM sales and sales and marketing before HIMSS17, and we expect these leaders to provide access to new channels domestically and internationally.”

The Secant Healthcare team is slated to introduce new solutions in 2017, including a newly revamped data migrator dashboard, a data analytics tool, and a migration engine that is 30% faster than its current application.

“We have successfully piloted these new solutions with multiple customers, including The Mount Sinai Hospital,” said Baya. “We have a great story to tell, and we look forward to sharing our recent work with everyone at HIMSS17.” Secant Healthcare will also introduce integration solutions to select companies in the first quarter of 2017.
